Use-Case Specification: Trainingsplan erstellen

1. Use-Case Trainingsplan erstellen

1.1 Brief Description

Dieser Usecase ermöglicht es dem Benutzer, einen neuen Plan anzulegen, zu benennen und abzuspeichern. Diesem Plan können danach nach Belieben sogenannte "splits" (z.B. Aufteilung in Ober- und Unterkörper) und Übungen hinzugefügt werden.

2. Flow of Events

2.1 Basic Flow

 $\underline{https://github.com/MH0896/MuM-s-Fit/blob/master/UCDs/Use\%20Case-Trainingsplan\%20erstellen.png}$

MuM's Fit	Version: 1.5
Trainingsplan erstellen	Date: 23/11/2016

2.2 Alternative Flows

2.2.1 Doppelte Namensgebung

Wen ein neuer Plan genau so benannt wird wie ein bereits bestehender Plan, schließt sich das Fenster mit der Meldung, bitte einen anderen Namen auszuwählen.

2.3 Mock-ups

2.5 Features

https://github.com/MH0896/MuMsFit/blob/master/features/CreateTrainingPlan.feature

```
Feature: Create Training Plan
     #feature
       Scenario: As a valid user I can create a blank training plan
         When I press "addPlan"
        And I enter text "testPlan" into field with id "calabash"
        And I press the "Okay" button
        And I press "readyButton"
        And I press the "Okay" button
         Then I see "testPlan"
       Scenario: As a valid user I must give a name to a new training plan
         When I press "addPlan"
13
         And I enter text "" into field with id "calabash"
        And I press the "Okay" button
         Then I see "Bitte einen Namen eingeben"
17
       Scenario: As a valid user I can't name a training plan with a name another plan has
        When I press "addPlan"
18
19
         And I enter text "testPlan" into field with id "calabash"
        And I press the "Okay" button
21
         Then I see "Name schon vergeben. Bitte wählen Sie einen anderen!"
```

3. Special Requirements

3.1 Functionality on Android

Die App wird vorerst nur für Android programmiert und muss daher für die gängigen Bildschirmgrößen optimiert sein. Es wird davon ausgegangen, dass die wenigsten mit einem großen Tablet zum Training gehen, daher liegt der Fokus auf kleineren Bildschirmen.

4. Preconditions

4.1 Plan erstellen

Die App muss gestartet sein.

5. Postconditions

n/a

6. Extension Points

n/a
