Use-Case Specification: Trainingsplan löschen

1. Use-Case Trainingsplan löschen

1.1 Brief Description

Dieser Use-Case ermöglicht es dem Benutzer einen oder mehrere ausgewählte Trainingspläne dauerhaft zu löschen. Das Löschen kann nicht rückgängig gemacht werden.

2.5 Features

https://github.com/MH0896/MuMsFit/blob/master/features/DeletePlan.feature

```
1   Feature: Delete one or more Training Plans
2
3     Scenario: As a valid user I can delete one training plan
4       When I press "addPlan"
5       And I enter text "testPlanD" into field with id "calabash"
6       And I press the "Okay" button
7       And I press "readyButton"
8       And I press the "Okay" button
9       And I see "testPlanD"
10      And I long press "testplan"
11      And I press "item_delete"
12      And I press the "Okay" button
13      Then I don't see "testPlanD"
14
15    Scenario: As a valid user I can delete several training plans
16      When I press "addPlan"
17      And I enter text "testPlanD1" into field with id "calabash"
18      And I press the "Okay" button
19      And I press "readyButton"
20      And I press the "Okay" button
21      And I see "testPlanD1"
22      And I press "addPlan"
23      And I enter text "testPlanD2" into field with id "calabash"
24      And I press the "Okay" button
25      And I press "readyButton"
26      And I press the "Okay" button
27      And I see "testPlanD2"
28      And I press "addPlan"
29      And I enter text "testPlanD3" into field with id "calabash"
30      And I press the "Okay" button
31      And I press "readyButton"
32      And I press the "Okay" button
33      And I see "testPlanD3"
34      And I long press "testPlanD2"
35      And I press "testPlanD1"
36      And I press "item_delete"
37      And I press the "Okay" button
38      Then I don't see "testPlanD1"
39      And I don't see "testPlanD2"
40
```

```
41    Scenario: As a valid user I can delete all training plans
42      When I press "addPlan"
43      And I enter text "testPlanD1" into field with id "calabash"
44      And I press the "Okay" button
45      And I press "readyButton"
46      And I press the "Okay" button
47      And I see "testPlanD1"
48      And I press "addPlan"
49      And I enter text "testPlanD2" into field with id "calabash"
50      And I press the "Okay" button
51      And I press "readyButton"
52      And I press the "Okay" button
53      And I see "testPlanD2"
54      And I long press "testPlanD3"
55      And I press "item_select_all"
56      And I press "item_delete"
57      And I press the "Okay" button
58      Then I don't see "testPlanD1"
59      And I don't see "testPlanD2"
60      And I don't see "testPlanD3"
```

3. Special Requirements

3.1 Functionality on Android

Die App wird vorerst nur für Android programmiert und muss daher für die gängigen Bildschirmgrößen optimiert sein. Es wird davon ausgegangen, dass die wenigsten mit einem großen Tablet zum Training gehen, daher liegt der Fokus auf kleineren Bildschirmen.

4. Preconditions

Die App muss gestartet sein und es muss ein Trainingsplan vorhanden sein.

5. Postconditions

n/a

6. Extension Points

n/a
